

Hardenberg Consulting is the leading recruitment consultancy for the veterinary medicine industry in the DACH Region (Germany, Austria, and Switzerland). Our client is the Center for Clinical Veterinary Medicine of the Ludwig-Maximilians-University (LMU) Munich. The LMU is one of the largest universities in Europe with a history of over 500 years and a reputation for excellence in academic education and research. The extensive global network with renowned partner universities and research centers contributes significantly to the international diversity of the campus.

The LMU Small Animal Clinic is conveniently located in the heart of Munich, in a vibrant and natural environment. A highly motivated team of over 200 employees is committed to providing the best possible patient care and excellent academic training standards on a daily basis. The spirit of research and high scientific standards are in alignment with first-class clinical care and human empathy.

To remain at the forefront of medical progress, we are actively promoting the inclusion of further specialised colleagues in the team of the University Veterinary Clinic. We are therefore seeking to fill the position of a full-time or part-time veterinarian as

## Senior Radiologist (m/f/d)

The center's cutting-edge equipment enables its international team of diplomates and specialist veterinarians to offer an exceptionally diverse range of services in the fields of internal medicine, surgery, reproduction, radiology, anesthesia, and many other disciplines. The technical facilities in the radiology department are among the best in Germany and offer state-of-the-art diagnostic imaging.

### Your tasks:

- You are part of the leading team of 20 senior veterinarians
- As a specialist in radiology, together with another DipECVDI, you will be the head of the radiology team, which consists of four veterinarians and three highly specialised assistants
- You are one of the experts responsible for complex cases in radiology and work closely with all veterinarians (m/w/d) in neighbouring departments of the clinic
- Your main tasks include the training, teaching and supervision of students and doctoral candidates (m/w/d) - you are actively involved in the training and further education of residents of the European College of Veterinary Diagnostic Imaging (ECVDI) as part of the residency program.
- You will coordinate with your senior physician colleagues in weekly meetings and organise regular retreats for doctoral students together with them
- You will work closely with referring colleagues and push the boundaries of modern imaging technology
- Through your expertise and creativity, you contribute significantly to the continuous improvement of services and motivate the entire department team to constantly expand their radiological competences
- You will report directly to the Head of the clinic

**Your requirements:**

- You are a veterinarian (m/w/d) with several years of specialisation in radiology and are qualified as a Diplomate of the European College of Veterinary Diagnostic Imaging (ECVDI) or the American College of Veterinary Radiology (ACVR). If you are at the end of your residency just before the examination, you are equally welcome!
- Ideally, you already have experience in training and supervising employees and can provide appropriate guidance to colleague
- You love working with people and animals alike
- Ideally, you are passionate about research and enthusiastic about science as well as hands-on work with animals.
- You enjoy working in an interdisciplinary manner
- Collegiality, independence and a sense of responsibility round off your profile

**Our offer:**

We offer you the exceptional opportunity to take on a leading role in one of Germany's leading veterinary clinics, which enjoys a special reputation in research and teaching far beyond its borders. The working culture is characterised by a warm working atmosphere in which regular team-building activities and internal events are an expression of collegial cohesion for many years. As a senior physician, you will always work in partnership with the clinic management. This gives you exceptional creative freedom to realise your own ideas in clinical work as well as in research and teaching. Your own office, flexible working hours and the corresponding willingness of the clinic management to invest provide the framework for your success. In addition, the environment with two renowned medical faculties on the doorstep offers ideal conditions for collaboration in research at the highest level. At the Small Animal Clinic at LMU you can make your mark as a globally recognised specialist and make a significant contribution to the long-term success of the clinic. This position offers a unique opportunity to make a lasting impression on the next generation of veterinarians!

Your workplace is located in one of Europe's cultural metropolises with numerous cultural monuments, renowned museums, concert halls, theatres and a famous opera house. The diverse gastronomic offerings, from the numerous beer gardens to haute cuisine - not least the annual Oktoberfest - epitomise the special Bavarian attitude to life, cosmopolitanism and internationality. The proximity to the Alps and the picturesque Upper Bavarian lakes also offer a high recreational value for families and individualists alike.

As part of the personnel development programmes, qualified candidates are supported in their preparation for the ECVDI or ACVR examination.

Our consultant Dr Jan Hendrik Schwarz and his team will be glad to make initial contact with you on +49 8178 9986410.
